DETAILED ACTION

1. Claims 1-56 are pending in the instant application.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to a method of regulated expression of a heterologous gene in the germline of *C. elegans* by inserting a transgene construct comprising the heterologous gene operably linked to a promoter and a 3' untranslated region of a *C. elegans* gene.

Group II, claim(s) 20-46, drawn to a method of transposon-mediated mutagenesis in a *C. elegans* genome by introducing a transgene comprising a transposase operably linked to a promoter and a 3' untranslated region of a *C. elegans* gene.

Group III, claim(s) 47-56, drawn to a method of expressing a heterologous DNA sequence in *C. elegans* by introducing a transposon comprising the heterologous DNA and a construct expressing a transposase protein.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions of groups I and II lack the same technical feature because the invention of group II requires expression of a transposase protein whereas the invention of group I does not require any transposase protein expression.

Art Unit: 1632

The invention of group III lacks same technical feature as group II because the invention of group II does not require a DNA comprising a transposon to be introduced in the *C.elegans*.

3. Because these inventions are distinct for the reasons given above and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ram R. Shukla whose telephone number is (703) 305-1677. The examiner can normally be reached on Monday through Friday from 7:30 am to 4:00 p.m. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Reynolds, can be reached on (703) 305-4051.
